

## De-Ionized Water Fire Extinguisher

The ultimate extinguisher for class A fires, especially where a potential Class C (electrical) hazard exists. The fine spray from the unique misting nozzle provides safety from electrical shock, greatly enhances the cooling and soaking characteristics of the agent and reduces scattering of the burning materials. Unequivocally the best extinguisher for hospital environments, telecommunications facilities and "clean room" manufacturing facilities.

### User Friendly:

- Wand provides greatest operator safety
- Maximum visibility during discharge
- No electrical conductivity back to the operator
- No thermal or static shock
- Minimal training - simplest to use, least expensive agent available

### Clean:

- No toxicity
- No respiratory concerns
- De-ionized water extinguishing agent
- Exclusive crevice free, butt welded cylinder
- Antiseptic white paint finish (easy to clean interior & exterior)
- No powder residue
